### **DETAILED ACTION**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-33, drawn to a system and a network server for generating pre-paid airline tickets, classified in class 705, subclass 5.
- II. Claims 34-49, drawn to a method for providing pre-paid airline tickets and a computer program used to support the method, classified in class 705, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group I is distinct from Group II because the computer system can perform other methods such as word processing or e-mail

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Claims 1-16 will be examined regardless of which Group is elected.
